The Personal Outcomes Measures

The Personal Outcomes Measures (POMs)¹ look at whether services and supports are having the desired results or outcomes that matter to an individual. POMs are organized into 3 key factors and 21 personal outcome measures. The formal POM tool should be used by a trained professional. However, the indicators can be used informally as a starting place to help individuals and their families determine if services are beneficial.

1. My Self

 People are connected to natural supports 	Yes No
